Earth Day is now a global event each year, and we believe that more than 1 billion people in 192 countries now take part in what is the largest civic-focused day of action in the world.

It is a day of political action and civic participation. People march, sign petitions, meet with their elected officials, plant trees, clean up their towns and roads. Corporations and governments use it to make pledges and announce sustainability measures. Various organizations that leads Earth Day worldwide, has chosen as the theme for 2018 to End Plastic Pollution, including creating support for a global effort to eliminate primarily single-use plastics along with global regulation for the disposal of plastics. The organizations are educating millions of people about the health and other risks associated with the use and disposal of plastics, including pollution of our oceans, water, and wildlife, and about the growing body of evidence that plastic waste is creating serious global problems.

From poisoning and injuring marine life to the ubiquitous presence of plastics in our food to disrupting human hormones and causing major life-threatening diseases and early puberty, the exponential growth of plastics is threatening our planet’s survival. Also it has built a multi-year campaign to End Plastic Pollution. Our goals include ending single-use plastics, promoting alternatives to fossil fuel-based materials, promoting 100 percent recycling of plastics, corporate and government accountability and changing human behavior concerning plastics.

TNSRO’s End Plastic Pollution campaign includes four major components:

- Leading a grassroots movement to support the adoption of a global framework to regulate plastic pollution;
- Educating, mobilizing and activating citizens across the globe to demand that governments and corporations control and clean up plastic pollution;
- Educating people worldwide to take personal responsibility for plastic pollution by choosing to reduce, refuse, reuse, recycle and remove plastics and
- Promoting local government regulatory and other efforts to tackle plastic pollution.

/Save Earth and its Resources/

Naturally yours

Vijikumar Sahadevan

Editor in Chief, IJONS
